

Hoosic River Watershed

MASSACHUSETTS - VERMONT - NEW YORK

REFERENCE MAP AND RECREATION GUIDE TO THE HOOSIC RIVER AND ITS WATERSHED

The Hoosic River Watershed Association is the citizens' group that looks after the river. We are dedicated to the restoration, conservation and enjoyment of the Hoosic River and its watershed, through education, research, and advocacy. We envision a watershed that is ecologically sound and adds to the quality of life of its residents.

HoosRWA works in the watershed's three states and several communities to protect water quality, establish trails and river access sites, and promote appreciation for the river with hikes, workshops, cleanups, festivals, and more.

Membership inquiries are welcome.
